

Monday 22 July

- 9.15 - 10.15 Auslander/Knörrer 2  
10.25 - 11.10 Happel : On the derived category of a finite dimensional algebra  
11.45 - 12.45 Roiter 3  
2.15 Dowbor/Skowronski : Galois coverings of representation infinite algebras (continued)  
3.15 Happel : Triangulated categories, background and continuation.  
5.00 - 6.00 Benson 1  
6.10 - 6.40 Fischbacher : Combinatorics of Ray Categories  
\* 8.30 ) Bautista : Almost isomorphic algebras  
9.05 ) Butler/Ringel : The Gelfand quiver and related problems  
\* 8.30 Robinson : Characters of relatively projective modules.

Tuesday 23 July

- 9.15 - 10.15 Kraft 2  
10.25 - 11.10 Reiten : Scrolls of finite Cohen-Macaulay type  
11.45 - 12.45 Benson 2  
2.15 Linnell : Cohomology of finite soluble groups  
2.50 Yamagata : Nakayama automorphisms and extension algebras  
3.20 Unger : Stars  
5.00 - 6.00 Auslander/Knörrer 3  
6.30 for 7.00 Sherry, BANQUET

Wednesday 24 July

- 9.15 - 10.15 Kraft 3  
10.25 - 11.10 Erdmann : Algebras and blocks with dihedral defect groups  
11.45 - 12.45 Auslander/Knörrer 4  
2.15 von Höhne : A new proof of the '4-terms in the middle' theorem  
2.35 Bautista : A remark on algebras without oriented cycles in the AR quiver  
5.00 - 5.30 Todorov/Igusa  
5.35 - 6.05 Wiedemann : Integral configurations of  $\mathbb{Z}D_n$  and their realizations  
6.10 - 6.40 E.L.Green : Homology of quotients of path algebras

\* ALL 'FRINGE' LECTURES IN ROOM CM221, EXCEPT ROBINSON, ROOM CM219.

Fringe Programme

Friday 19 July

- |      |            |                                                                                    |
|------|------------|------------------------------------------------------------------------------------|
| 2.15 | D'Este     | Glueing together extended strings                                                  |
| 2.50 | de la Pena | Zero relation algebras with oriented cycles of non-invertible morphisms            |
| 3.20 | Simson     | A module-theoretic study of matrix problems and factor categories of mod $\Lambda$ |

Monday 22 July

- |      |                       |                                                                  |
|------|-----------------------|------------------------------------------------------------------|
| 2.15 | Dowbor/<br>Skowronski | Galois coverings of representation-infinite algebras - continued |
| 3.15 | Happel                | Triangulated categories, background and continuation             |

Tuesday 23 July

- |      |          |                                               |
|------|----------|-----------------------------------------------|
| 2.15 | Linnell  | Cohomology of finite soluble groups           |
| 2.50 | Yamagata | Nakayama automorphisms and extension algebras |
| 3.20 | Unger    | Stars                                         |
