Lectures:

Friday, 3rd July

ARVESON: "Connections and semi-groups of endomorphisms of $B(H)$ "

CUNTZ: "A new look at KK-theory"

Chairman - Schochet

OCNEANU: "Rigidity-string algebras and classification of subfactors"

POWER: "Dilation and lifting for representations of non-self-adjoint algebras"

ARCHBOLD: "Inductive limits of continuous trace C^* -algebras"

Saturday, 4th July

Chairman - John Wright

HIGSON: "Algebraic K-theory and homotopy invariants"

MUHLI: "Triangular operator algebras"

Chairman - A.Sinclair

ARVESON: "Is this group connected?"

LARSON: "Reflexivity and similarity on operator algebras"

OCNEANU: informal session on "String algebras and central sequences for subfactors"

Monday, 6th July

Chairman - Araki

ROSENBERG: "Applications of analysis of Lipschitz manifolds"

CHRISTENSEN: "Multilinear mappings and cohomology"

Chairman - P.Baum

CUNTZ: "A new look at KK-theory II"

PLYMEN: "Reduced C^* -algebras of certain matrix groups"

PHILLIPS: "K-theory of crossed products by homotopic actions"
